Names	Category	3/13	3/17	3/24	P1-- 4/3
Jeff	Things you did well	Completed HTML CSS and JS course work with a wireframe and P0	Did badges and P1 breakdown		I was able to get through more badges and the use cases
	Things you can Improve on	there are some more obscure terms and aspects of Javascript that I had not really seen before so I need to brush up on those	connecting the dots between the objects we need to use in P1and what we are learning in DEX		badge work breaking down use cases into the proper action in salesforce. Get more hands on in salesforce to become more familiar withwhat options are available on each screen
	Any unresolved user stories	Getting the API for the challenges to process correctly	linking the objects in project		processed the wrong activitiy for one of the use cases
	Velocity				12
	Other comments	We built up our communication skills as a team to a point where we are becoming more productive			I think we need a bit more working together time actually working together on aspects of class
Nick	Things you did well	Completed CSS and organization, had a good idea of what I wanted for my website through wireframes	Feel good about using salesforce, User stories feel less daunting than		I think I was efficient in doing my use cases and was available to try to help troubleshoot other team members' use cases
	Things you can Improve on	Time management- implementation of APIs, had to use a very simple API due to lower understanding	Bonus trailhead badges, QC studying		Began prep for presentation a bit sooner for more organized format
	Any unresolved user stories	Technically none, but had to drop intended features due to time constraints	None assigned		None assigned to me, and the group exceeded 100 pts

Parker	Things you did well	Was successful in doing deep-dive during self-studying to figure out problems as well as fully learn concepts I was hazy on before	Successful in learning more about salesforce and using it, trailhead badges are coming along. Understanding more of the requirements for the P1 and know where to improve for studying		Used class time efficiently to tackle use cases, had no problems troubleshooting on my own
	Things you can Improve on	Took too long to choose API, need to balance other jobs with this one	Could be more proactive about studying. Need to balance 2nd job with revature so I dont hold down team or get behind in studying		I could be more available to help others with their use cases; I was too focused on my own
	Any unresolved user stories	No additional user stories unresolved but could have added more features	n/a		none
	Velocity				12

Sam	Things you did well	I quickly met the base requirements such as getting an API request	Leadership initiative: Pushed for the Kanban board early on; Set up the Salesforce TP early on	I figured out my first ever Salesforce use case; got comfortable implementing related lists	Pushed to structure the presentation; fixed 2 use cases which broke for unknown reasons
	Things you can Improve on	Following my SDLC steps closer, especially following my own wireframe	get working on user stories	Understanding access/security - it's difficult to think through when a field isn't showing up	Better integration of demonstrations into presentation; better data security practices
	Any unresolved user stories	Adding an element to the info section of my site without it duplicating on second select	n/a	Showing campaigns on related list for opportunities	n/a
	Velocity		n/a	4	13
	Other comments			completed use cases: allow lead engineer to add certs, make certification records visible	We need to rehearse our presentations more thoroughly
Taylor	Things you did well	Implementing the API into the first three buttons for my HTML document	Ryan and I completed the ERD	Grasping service cloud and its associated features	I did well at implementing the use cases into the Salesforce platform
	Things you can Improve on	Flex-Box maneuvering: need to work on flex-box orientations for my document + webpage design	The current progress I have on the user stories	Working better with flows + getting more familiar with the debug logs	I need to work on the presentation of my information
	Any unresolved user stories	Adding additional API calls to the other three buttons of my HTML document	n/a	N/A	N/A
	Velocity			Approx. 8	Approx. 14

Firehawks/ team as a whole	Things you did well	- We collaborated well to each other to make sure every one had a functioning API - Completed HTML CSS and JS course work with a wireframe and P0 - Helping each other overcome issues, especially related to API Requests – big kudos to Jeff and Ryan; - Making big decisions earlier in the design process such as the API to use for P0 - Communication during our stand-ups was clear and focused - We were very comfortable collaborating even though we don't know each other well	- Improved communications a lot - Better understanding of overall requirements of Project 1 - More confident with user stories (size not so daunting) - Feel more intuitive with the Salesforce platform - Very good Scrumban board setup		Solid communication, decent collaborating and helping each other
	Things you can Improve on	- We could work on uploading more information to Trello this week - Made some design decisions and steps earlier	- Need to assign user stories - Even better communications and dedication to moving the team forward		Time management, presentation preparation and cohesiveness, Not beating our heads against a wall, using the resources we have
	Any unresolved user stories
